DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the tamper-evident structure “encasing a first portion of the zipper closure” (claim 40) and the opening being “defined by the tamper-evident structure” (claim 40) must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 40-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, fails to provide antecedent basis for the tamper-evident structure "encasing a first portion of the zipper closure" and the opening being "defined by the tamper-evident structure". This is a new matter rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 40-43 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent Nos. 6,273,607, 6,290,390 and 6,347,885; all to Buchman.

Response to Arguments

6. Applicant's arguments filed 12/12/2005 have been fully considered but they are not persuasive.

Applicant's reliance on Figures 4a and 5a in combination with Figure 25 to show antecedence for a tamper-evident structure "encasing a first portion of the zipper closure" and an opening being "defined by the tamper-evident structure" is misplaced. As shown in applicant's Figure 25, the zipper profiles 9, 10 are below perforations 124 and the tamper-evident film extensions 126 are above the perforations 124. Therefore, the film extensions 126 do not "encase" a first portion of the zipper profiles 9, 10.

Applicant's reference to "column 4, lines 22-34" in the fourth paragraph of the REMARKS is not understood.

Applicant's reliance on "opening 168" being defined by the tamper-evident structure and exposing the slider is misplaced because "opening 168" is not found in applicant's specification.

Applicant's remarks do not convince the Examiner that the specification, as originally filed, provides antecedent basis for the tamper-evident structure "encasing a first portion of the zipper closure" and the opening being "defined by the tamper-evident structure". Therefore, the Examiner maintains claims 40-43 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent Nos. 6,273,607, 6,290,390 and 6,347,885; all to Buchman.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
